Commissioner Robert M. McDowell
445 12th Street SW
Room: 8-C302
Washington, DC 20554

Dear Robert M. McDowell,

As an avid and passionate Internet "surfer," I ask that you do everything you can to foster healthy, price-cutting competition in the high-speed Internet market. While the Federal Communications Commission (FCC) prepares to auction off the prized 700-megahertz band of wireless broadband spectrum, I urge you to reserve at least half of this spectrum for unbridled wholesale competition. The fear is that the FCC will simply allow AT&T, Comcast, and Verizon to dominate the spectrum and bump off any competition. Such bullying behavior has allowed big cable and phone companies to control about 96 percent of the high-speed market. As a result, these companies have bypassed tens of millions of customers who weren't deemed lucrative enough, or they have been allowed by sparse competition to charge exorbitant rates. The result is that more than half of adult Americans don't subscribe to broadband Internet, which is largely too expensive or inaccessible. Please take advantage of this great opportunity and protect our precious public airwaves from the cable and phone giants' competition-killing stranglehold on broadband Internet. Just as importantly, I ask that you hold any broadband service operators in the 700 MHz band to strict "net neutrality" standards, and mandate that they allow consumers to use any equipment, content, application or service without interference in the spirit of the FCC's 1968 "Carterfone" decision.

Sincerely

Cheryl Bouvet

Commissioner Robert McDowell

Dear Commissioner McDowell,

The airwaves belong to the public, not corporations like Verizon and AT&T whose anti-competitive practices have resulted in the U.S. falling to 16th in the world in high-speed Internet rankings.

To restore America's leadership in high speed Internet services, the FCC must ensure that the upcoming auction sets aside at least 30 MHz of spectrum for open and non-discriminatory Internet access. This will guarantee that new entrants have the opportunity to enter the market in competition with incumbent providers.

It would be a big mistake to hand over these airwaves to the very same phone and cable companies that dominate the wireline market. We need more competition and innovation, not more of the same. This new wireless spectrum must be open and neutral so that America can build a better Internet for everyone.

Sincerely,
Heidi Haas

Dear Robert M. McDowell,

I have always understood that the airwaves belong to American citizens. I am a senior whose income is not keeping up with advancing living costs and here's another potential increased cost coming my way.

Please do everything you can for competition in the high-speed Internet market. As the FCC prepares to auction off the 700-megahertz band of wireless broadband spectrum, I urge you to reserve at least half of this spectrum for unbridled wholesale competition.

Big cable and phone companies have not considered millions of people like me on limited incomes and with little competition, the companies charge high rates. Competition is needed! Also, consumers should have the right to use any equipment, content, application or service without interference in the spirit of the FCC's 1968 "Carterfone" decision.

Please protect our public airwaves from the big cable and phone companies' hold on the broadband Internet.

Sincerely

Robert Epler

Room: 8-A204
Washington, DC 20554

Dear Deborah Taylor Tate,

As an avid and passionate Internet "surfer," I ask that you do everything you can to foster healthy, price-cutting competition in the high-speed Internet market. While the Federal Communications Commission (FCC) prepares to auction off the prized 700-megahertz band of wireless broadband spectrum, I urge you to reserve at least half of this spectrum for unbridled wholesale competition. The fear is that the FCC will simply allow AT&T, Comcast, and Verizon to dominate the spectrum and bump off any competition. Such bullying behavior has allowed big cable and phone companies to control about 96 percent of the high-speed market. As a result, these companies have bypassed tens of millions of customers who weren't deemed lucrative enough, or they have been allowed by sparse competition to charge exorbitant rates. The result is that more than half of adult Americans don't subscribe to broadband Internet, which is largely too expensive or inaccessible. Please take advantage of this great opportunity and protect our precious public airwaves from the cable and phone giants' competition-killing stranglehold on broadband Internet. Just as importantly, I ask that you hold any broadband service operators in the 700 MHz band to strict "net neutrality" standards, and mandate that they allow consumers to use any equipment, content, application or service without interference in the spirit of the FCC's 1968 "Carterfone" decision.

Sincerely
